

REPAIR SETS – WIRE HARNESS

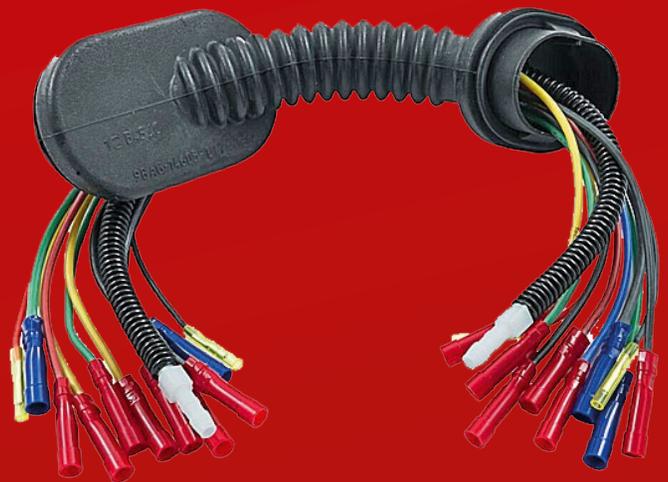

ENGINE WIRE HARNESSES – COMFORT SYSTEMS – LIGHTING- DOORS AND TAILGATES

. Sustainable and cost-saving repairs of wire harnesses,
with the innovative repair-solutions from Metzger

They save time in the workshop and are cost efficient
for the customers.

Small damage, major repair!

The plug connectors at the wire harness, which be-
came brittle, break when dismantling them or are
corroded. The cores of the door wire harness break, as
the cable cable insulation became hard.

Repair solutions on the highest level

Construction and quality defects made by the car
manufacturers are taken into account and eliminated
during the development of the wire harnesses.

- High flexible cable strands with silicone insulation
instead of the original PVC-cable.
- Lamp connectors made of ceramic are resistant
against high thermal stress.

Fast and efficient repairs

- All necessary components are included car specifically
- Easy assembly by the use of crimp-connectors
- Water proof butt joints with shrinking tube
- Cable strands are similar to OE in colour and profile.
No danger of confusion.
- Maximum pre-assembly
- With assembly instructions if practical

German manufacturer. Produced in highest quality,
even above OE for a sustainable repair.

REPAIR SETS – WIRE HARNESS

OUR RANGE

We offer you a wide range of vehicle-specific and universal repair sets for the following applications:
Doors, tailgates and boot lids

Comfort systems

- Control unit for window lifts
- heater fan
- series resistor heater fan
- seat heating
- wiper motor
- Coaxial line for radio and GPS
- Refit adapters for pulse generator

Lighting

- headlight
- Xenon control unit
- headlight range adjustment
- rear light

wire harnesses

- EGR-Valve
- Air flow meters
- Throttle valve
- Injection nozzles
- Injectors
- Glow plugs
- Generators
- Engine wire harness
- Exterior temperature sensor
- Refit adapter for pulse generator
- Fuse box / body computer
- Ignition coils

Adapter cables

Universal articles

- Repair set pipe, window cleaning
- Repair set engine wire harness
